

SERVICE RECORD

Your Insignia shower is unlike any other. Electrically, your product is carrying a computer, touch screen control, steam generator and much more (models vary).

On the water side it carries many pipes, connections and a water valve with various cabin internal features. IT MUST BE SERVICED TO AVOID FAILURE. Always run your steam generator at least once a week to ensure all the generator internals are kept in a free flowing condition.

Spares/Replacements Parts: outside of your warranty contact 0844 800 3069
